I wanted to take this opportunity to pass on an idea to consider for an inexpensive way to upgrade the appeal of your home.

Landscaping is one of the best home investments you can make. A well-placed tree or shrub will add to your enjoyment and increase resale value. For under \$100, you can choose from a wide selection of quality nursery stock and plant them yourself. If you like, you can play with some of the gardening software that's out there and get an idea of what your work will look like.

Try to plan it out in advance; you can add a shrub at a time.

A perennial garden will bloom year after year. This permanence makes it a landscaping fixture and thus adds value to your home. If you prepare and plant the garden yourself, \$100 will buy a good stock of perennials. For the best enjoyment and value, take the time to measure your property and use graph paper to design the best placement of your perennial garden. Many local nurseries also offer free help with garden design.

Best wishes to you, and please do not hesitate to contact me if I might be of any assistance to you at this time!

If you know someone who might benefit from my services, please pass on my contact information. I would truly be honored to assist them, and you can rest assured that they will receive top quality service. Thank you - I appreciate your referrals!
